Date: Saturday, June 7, 2014

Time: 9:30 - 11:30 a.m.

Mill Creek Ravine is one of the few known locations in Edmonton where this non-native and invasive species has been discovered. Garlic Mustard can take over large areas of woodland and cause negative long-term effects to native soils, vegetation and wildlife.

The pulls will be weather dependent. Please check the City of Edmonton [Facebook](#) and [Twitter](#) pages for updates if the weather is poor.
