ETS to test LRT tunnel fans

On **Sunday, March 1, 2015** and **Monday, March 2, 2015** Edmonton Transit System (ETS) personnel will be testing the fan system in the downtown LRT tunnels near Churchill, Central and MacEwan Stations during early morning hours, from approximately 1 a.m. to 4:30 a.m.

The testing is designed to measure the effectiveness of the fan system to remove smoke quickly and efficiently. ETS personnel will use special events fog to simulate smoke during the tests. Nearby residents and businesses may see fog coming out of the exhaust ventilation shafts near the stations and are advised this testing is a normal part of LRT operations and maintenance.
