## ETS to test LRT tunnel fans

On Saturday March 7, Sunday, March 8, and Monday, March 9, 2015 during early morning hours (from approximately 1 a.m. to 4:30 a.m.) Edmonton Transit System (ETS) personnel will be testing the fan system in the downtown LRT tunnels near Churchill, Central, Bay, Corona and Grandin Stations.

The testing is designed to measure the effectiveness of the fan system to remove smoke quickly and efficiently. ETS personnel will use special events fog to simulate smoke during the tests. Nearby residents and businesses may see fog coming out of the exhaust ventilation shafts near the stations. This testing is a normal part of LRT operations and maintenance.
