Edmonton Transit tests fan system

Edmonton Transit System will use a special fog to test the fan system of the downtown LRT tunnels in the early morning hours of August 27, 28 and 29, 2015, including the tunnel of the new Metro Line.

Nearby residents and businesses may see fog near Churchill Station and MacEwan Station during testing which will take place from approximately 1 a.m. to 5:30 a.m. The test fog is non-toxic and odorless.

The testing is designed to measure the effectiveness of the fan system to remove smoke quickly and efficiently. This testing is a normal part of LRT operations and maintenance.
