

Corona LRT station switch repair on Sunday

Metro Line operating between Bay and NAIT LRT stations

This Sunday, January 31, some LRT passengers requiring use of both the Capital and Metro Lines may need to transfer trains in order to reach their destination.

Trains will be sharing a single track at the Corona LRT station while crews perform a switch repair. To keep Metro Line service running at a 15 minute frequency, Metro Line trains are being adjusted to operate between NAIT and Bay LRT stations (as opposed to Health Sciences station).

The planned switch repair will take place between 5 a.m. and 5 p.m. For safety, trains traveling in both directions will divert around the workers and share arrivals/departures on track two. Sharing one track requires reduced train speeds in this area.
