

City to provide update on mosquito season

May 25, 2016

Despite bringing much-needed moisture, the recent heavy rainfall also resulted in high humidity and a substantial amount of standing water — perfect conditions for mosquito development.

To make summer more enjoyable for Edmontonians, the City of Edmonton's pest management team is working to treat mosquito larvae in temporary or semi-permanent bodies of water.

Media are invited to attend an update from Mike Jenkins, Biological Sciences Technician, on the City's mosquito control program.

Date: Wednesday, May 25, 2016

Time: 2 p.m.

Location: Goldbar Park ([google map](#)) by the pond
