

Lane closures affecting 105 Street & Jasper Avenue

July 14, 2016

Starting on Monday, July 18, lane closures will take effect on 105 Street between Jasper Avenue and 102 Avenue to accommodate drainage upgrades that are part of the revitalization of Edmonton's downtown.

This work is being undertaken by the City's Utilities Infrastructure team to meet the stormwater and wastewater needs of new businesses and residents moving downtown. The upgraded system will also help reduce combined sewer overflow and basement flooding for existing businesses and residents in the neighbourhood.

The City will set up a construction shaft and drill site on 105 Street just north of Jasper Avenue to prepare for underground tunnelling. This site will cause disruptions to traffic and parking in the area and will create some daytime noise.

From July 18 through July 21, all southbound lanes on 105 Street will be closed. Parking will no longer be available on the west side of 105 Street near the work site. All traffic movements at the intersection of 105 Street and Jasper Avenue will be retained.

Other work in the area will last until the end of November 2017, including:

- The northbound direction of 105 Street will be reduced to a single-through lane and retain dedicated left-turn and right turn lanes at Jasper Avenue.
- The middle two lanes on 105 Street north of Jasper Avenue will be closed from Jasper Avenue north to 102 Avenue. This closure will reduce traffic flow to one lane in each direction.

Additionally, the bus stop on the east side of 105 Street north of Jasper Avenue will be moved about 120 meters to the north to keep the one lane northbound on 105 Street completely open.

Work will occur during regular working hours beginning at 7 a.m. until 3:30 p.m., Monday through Friday. Some overtime hours may be required. The City of Edmonton thanks motorists and residents for their patience while we carry out this required construction.
