The Infill Design Competition is a response to the growing demand for infill in Edmonton's core and mature neighbourhoods. The competition provides an opportunity for designers to showcase innovation and best practices that could improve the quality of infill development in our City. While the contest does not entail the actual construction of submitted projects, ideas generated through the competition will help establish infill in a way that's best for our city today and in the future.

Also, watch for your chance to vote of your favourite design during the People's Choice Voting in the coming weeks. Winners of the competition will be announced in the fall.
