

Mill Creek Daylighting open house

November 9, 2016

Join us November 16, 2016 for the Mill Creek Daylighting open house. The City of Edmonton is exploring opportunities to revitalize Mill Creek through "daylighting". This process involves bringing buried portions of the creek back to the surface and reconnecting it to the North Saskatchewan River.

The project team is seeking to research and understand available restoration opportunities and develop a potential approach for realizing environmental and community benefits such as clean water, healthy ecosystems, and enhanced connections in the River Valley. Citizens are encouraged to attend the open house to learn more.

Date: Wednesday, November 16, 2016

Time: 4 p.m. - 8:30 p.m.

Location: Cloverdale Community League, 9411-97 Ave

The first step is to assess the technical feasibility of daylighting Mill Creek and restoring connectivity to the North Saskatchewan River. The feasibility study will examine the potential constraints, opportunities, and costs associated with daylighting the downstream reach of Mill Creek. Results of the technical and financial assessment, as well as input from citizens and stakeholders, will be used to determine whether restoration work should be undertaken.
