Public invited to learn about Victoria Trail Bridges Rehabilitation

April 6, 2017

Residents are invited to attend a drop-in pre-construction public meeting to learn more about the Victoria Trail Bridges Rehabilitation project. The two bridges affected are Victoria Trail Bridge over Yellowhead Trail and Victoria Trail Bridge over Kennedale Ravine. City staff and project members will be on hand to discuss the rehabilitation activities, timelines, and impacts.

Date: Tuesday, April 11

Time: 4:30 - 8 p.m.

Location: South Clareview Hall, 3250 - 132A Avenue NW

The rehabilitation work on both bridges will ensure safe operation for many more years. Construction will begin this spring with the removal of the median. Starting this summer, half of each bridge will close, leaving one lane open in each direction. Pedestrians and cyclists will also be accommodated on both bridges during construction. Stages two and three will start this summer, and will continue into 2018.

The northbound left-hand turn lane onto the Yellowhead Trail West will be closed during construction. Residents are asked to take either 118th Avenue or Hermitage Road to 50th Street, which then connects back to the Yellowhead Trail West, as the alternate routes during construction.

The staircase leading into the Kennedale Ravine will also be closed for approximately one month as the upper portion of the staircase is reconstructed to align with the widened Shared Use Path. There will also be intermittent trail closures to accommodate work on the bridge.
