## Schedule Guide

To find the calculated times that a bus stops at a particular location, read down the column under that classification.

To find the estimated times that a particular bus will stop at other locations, read across the row (left to right).

Reading across the row tells you the time required for the bus to travel between two timing points.

---

### Example

For the schedule to arrive at 10:55 & MacDonald station, you will need to board the bus at Capilano Town Centre before 10:48 a.m.

---

To find the estimated times that a particular bus will stop at other locations, read across the row (left to right).
